

# Electrical Fitter Mechanic

# NRG

NRG Gladstone Operating Services (NRGGOS), a wholly owned subsidiary of NRG Energy Inc; operates and maintains the 6 unit, 1680MW Gladstone Power Station (GPS); a world class coal fired facility providing safe, reliable, low cost power. The new leadership team is combining the knowledge from an experienced generation with the energy of the younger generation to produce The Next Generation NRG.

As a member of the Units Electrical workgroup your role will focus on the following accountabilities:

- Delivering effective, preventative maintenance strategies and providing quality responses to breakdowns
- Performing general maintenance duties within the Units Electrical area of plant to support optimal station reliability and availability
- Providing technical input into planning and recommending improvements to standards, procedures and systems

Applicants must hold a trade certificate endorsed Electrical Fitter Mechanic and have a relevant heavy industry background.

Instrument calibration experience and the ability to fault find on Program Logic Control and Distributed Control Systems is preferred.

High Voltage equipment maintenance experience will be highly regarded.

This is a permanent position offering excellent wages and employee conditions, career opportunities, a flexible 9 day fortnight and relocation to Gladstone.

Further information about NRGGOS is available on the website [www.nrggos.com.au](http://www.nrggos.com.au).

A copy of the role description and additional employee information is available from Downing Teal Pty. Ltd; Gladstone by phoning Leonie Hills (07) 4970 0800.

Applications closing 12 March 2010 can be submitted via the website <http://jobsearch.downingteal.com> by entering 113105.
